a
15,560 genes with an annotated 3′ end
8,977 uncontested
the baseline already ranks the annotated end first
6,583 contested
a competitor scores at or above the annotated end; 70,723 candidates
−18,119 competitors at an annotated poly(A) site
−1,076 competitors in a reference terminal exon
−1,660 genes left with no competitor
−1,398 competitors at or downstream of the annotated end
−76 genes left with no competitor
13,824 genes
8,977 uncontested + 4,847 analysis set
4,847 genes: analysis set
48,394 candidates: one annotated end and 43,547 competitors
